

## The Enterprise Portal as a Service Delivery Framework

Pat Edwards, OneStart Team

What do the following have in common?

- ✖ Benefits inquiry
- ✖ Posting of class materials on Web
- ✖ Grade inquiry
- ✖ PAF submission
- ✖ Admissions application
- ✖ Job requisition
- ✖ View class schedule
- ✖ Payroll voucher entry

How about these...?

- ✖ Budget transfers
- ✖ Research proposals
- ✖ Web ACH payments
- ✖ Physical Plant work orders
- ✖ Purchase requisitions
- ✖ Electronic timesheets
- ✖ Authentication requests
- ✖ WorkFlow requests
- ✖ Web purchases of IU gear

## Currently stand-alone

- ✖ Unique applications
- ✖ Different technologies
- ✖ Different user interface (UI) and Look/Feel
- ✖ Integration is sometimes an afterthought

... More importantly, who are the users?

## IU Constituents

- ✧ Students
- ✧ Faculty
- ✧ Staff
- ✧ Alumni
- ✧ Parents

## What is the problem?

- ✖ IU constituents must find and learn to use all of the different applications in order to access the broad array of services available to them.
- ✖ With each new stand-alone application, valuable development resources are used re-creating solutions for common features such as authentication, authorization, user interface, and workflow.

A portal framework can help.

- ✱ Provides a single “front door” for IU constituents to use when looking for services with easier access and a common interface.
- ✱ Provides a standard set of core services such as authentication, authorization, and workflow, allowing service providers to focus on the functionally unique services.

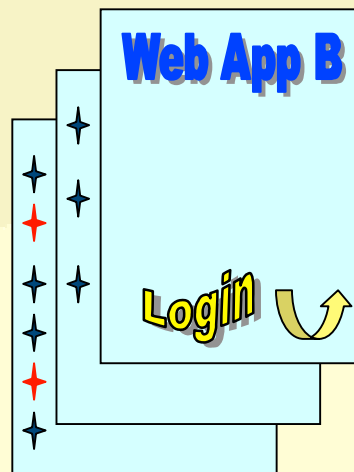

*Good News!*

IU has many very useful and valuable services available online. There are many more to come.

*Problem?*

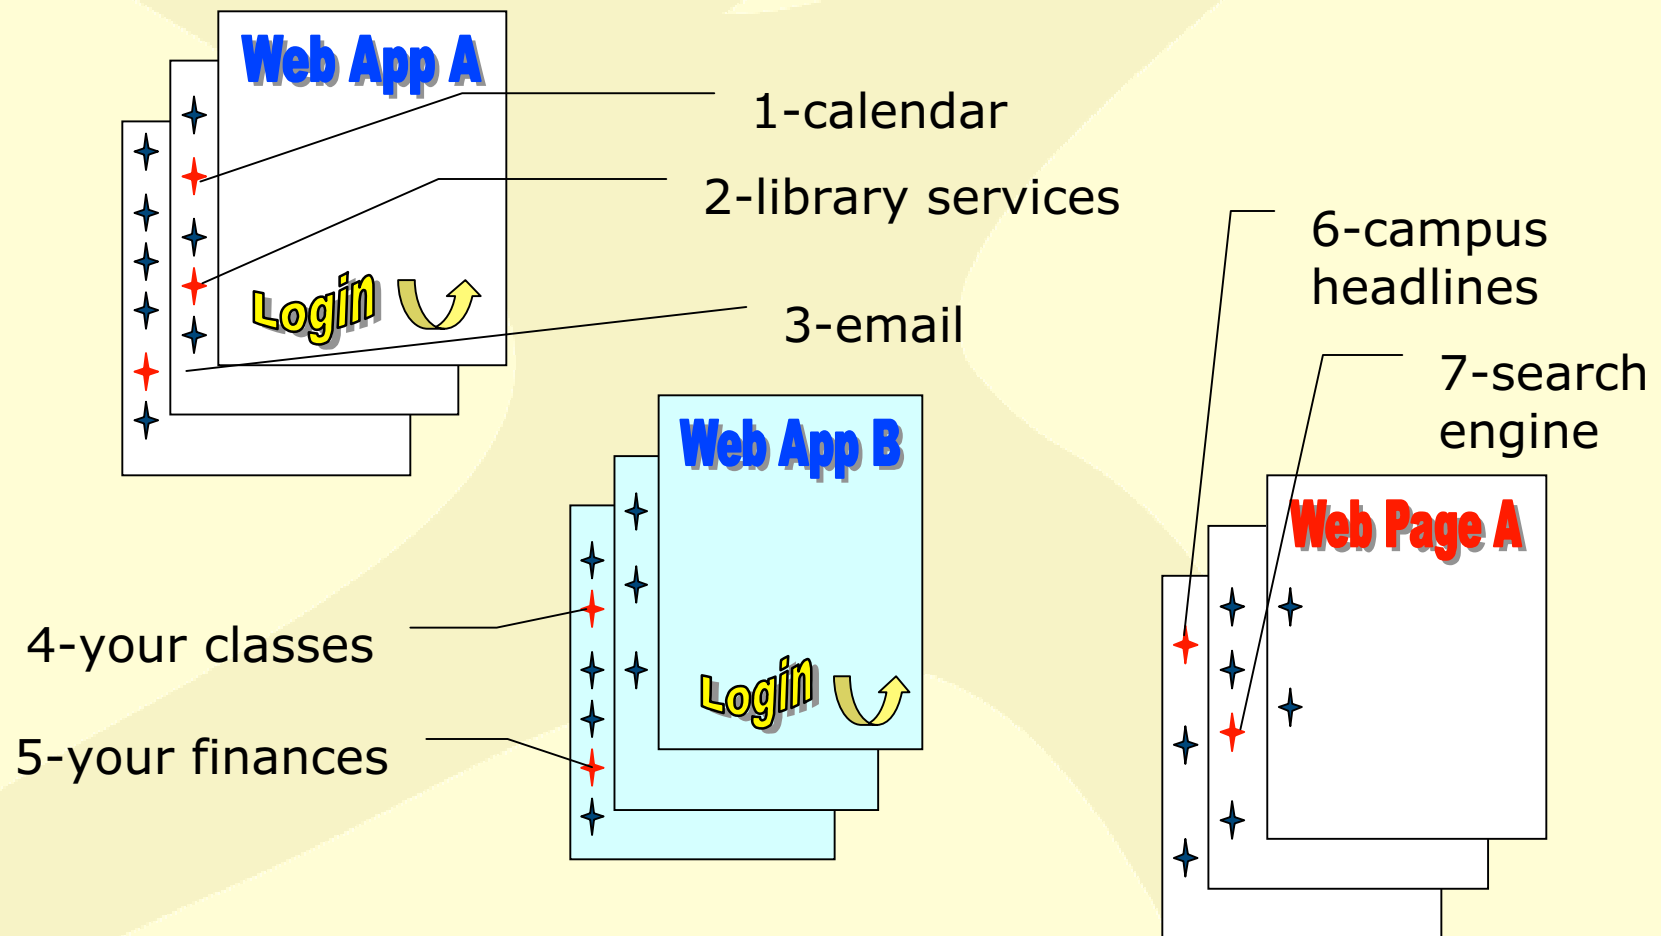

Numerous stand-alone, information or service “silos” requiring different logins, displaying different user interfaces, etc.

How our students access services today:

Using the OneStart framework, these “unbundled” services can be made readily available for easy access and combined to create a unique personal experience.

*Of interest to you...*

- OneStart uses CAS
  - More applications added that also use CAS (e.g., PTO online) eliminating the need for another login.
- We're helping create group pages
  - FIS group page
  - Admin support page for support center
  - HR docs page
  - ...how about one for your group?
- Freshman Orientation

*Coming soon to OneStart...*

- May release
  - Integrated calendar
  - Classified ads
- Future releases
  - E-mail
  - HR e-docs
  - Action list
  - Oncourse dashboard
